## **Immune Modulation Strategies**

Lyn Hanshew, MD

[AskDrLyn.com](http://AskDrLyn.com)

The idea is to detoxify and support the immune system that is obviously compromised, other wise a person would not be "sick". A properly functioning immune system is critical in order to heal from any type of illness or health condition. The common sources of damage to the immune system include toxic heavy metals and other environmental pollutants.

There are specific agents and strategies that can help detoxify the body and support the immune system as it regains function.

I strongly recommend that you become educated in the function of the immune system and methods to detoxify and support it.

A brief description of some well-researched strategies include:

### **I. Detoxification and pH Balance**

a) Activated Liquid Zeolite: This is an excellent detoxifier of toxic heavy metals and has been granted an FDA Patent for epithelial cancer. The Patent Number is 6288045. It also balances pH which is critical for normal cellular function. Contact your Waiora Independent Distributor. If you do not have an Independent Distributor, please [contact me](#).

b) Infra-red Sauna with Ozone Therapy: Infra-red sauna technology has been demonstrated to mobilize toxins and increase lymphatic drainage. Most of this research has been done by NASA. Contact [Synergy21Health.com](http://Synergy21Health.com)

### **II. Immune/Hormone Support**

a) Colostrum: This product is collected the first 6 hours from organic bovine herds. At this early stage, there are no bovine markers and the human body recognizes it as human. It is a great source of many immune-modulating factors, hormones, Natural Killer cells and Stem cells. Contact [Synergy21Health.com](http://Synergy21Health.com)

b) Transfer Factor: This product has been shown to increase the population of Natural Killer Cells (one type of White Blood Cells) by over 200%. The function of Natural Killer Cells is to "kill" or scavenge abnormal cells and infectious agents in the body. Visit [Synergy21Health.com](http://Synergy21Health.com)

c) Stem Enhance: Increases mobilization of Stem Cells. Contact [Synergy21Health.com](http://Synergy21Health.com)

### **III. Oxygen Support**

a) Oxyquest: This product increases the Oxygen level which is necessary for normal cellular function. See [Synergy21Health.com](http://Synergy21Health.com)

b) Ozone Therapy: Ozone therapy is the most efficient method of increasing Oxygen levels in the body. See Dr. Saul Pressman at [www.plasmafire.com](http://www.plasmafire.com)

#### **IV. Anti-oxidant**

a) Amigo: This is an excellent anti-oxidant product comprised of concentrated Acai, Goji and Mangosteen. 2 capsules or 1 scoop of powder has 1,000 ORAC units. Contact [Synergy21Health.com](http://Synergy21Health.com)

b) Glutathione, Inhaled Formula: Binds free radicals and helps the detoxification pathways. Contact Dr Steve MacPherson at 425-391-1080.

#### **V. Quantum Physics/Frequency**

a) Rife Technology: In the early 30's, Dr Rife invented frequency technology that successfully killed many types of abnormal cells. This is well-documented. Be sure to become educated about this incredible research scientist, his inventions and technologies. Go to [www.rife.org](http://www.rife.org). Contact Scott Carpenter at Chelsea's Sanctuary of Hope Society for more info- 503-864-9494.

#### **VI. Anti-Tumor Agents**

a) Methyl glyoxal: This is a naturally-occurring metabolite of the Krebs cycle in the body during the conversion of glucose to ATP. It has been demonstrated that Methyl glyoxal binds to the abnormal mitochondria in tumor cells and shuts down ATP production. See the article published in the peer-reviewed Journal Cancer Therapy, Vol 4, 2006. Contact Jenny for more info 269-876-8475 or [jennyhauf@yahoo.com](mailto:jennyhauf@yahoo.com)

b) Vitamin B17: This agent has been shown to selectively cause the death of tumor cells with no interaction with normal cells. Contact Jenny for more info- 269-876-8475 or [jennyhauf@yahoo.com](mailto:jennyhauf@yahoo.com)

c) LIMU NEI: Is comprised of Fucoidans from Brown Algae and studies show positive effects against Leukemia and other cancers. See research files Pub Med. Contact [Synergy21Health.com](http://Synergy21Health.com)

d) Shark Cartilage: lows blood supply to tumors. Contact Jenny for more info-269-876-8475 or [jennyhauf@yahoo.com](mailto:jennyhauf@yahoo.com).

e) Atlas Agaricus: Japanese mushroom that has been shown to have significant effects against virus-caused tumors. See [Synergy21Health.com](http://Synergy21Health.com)
